Mangosteen Fruit----- “ Super Antioxidant “
山竹果 ----- “ 超级抗氧化水果”

Mangosteen Skin 山竹果皮

果皮中鲜为人知的奥秘

蕴藏在山竹中，且广受研究的两种氧杂蒽酮 (**alpha mangostin & gamma mangostin**) 被发现具有保护**心血管健康**的特效。

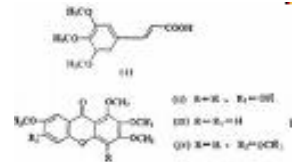

富含天然
抗菌、抗病毒和消炎的功效。

氧杂蒽酮 (山酮)

Xanthenes – Nature's Super Anti-Oxidant!

- Over 200 XANTHONES found in nature
- Mostly in wood, lichens and moss - unpalatable & inedible!
- But 43 of them are in the mangosteen!
- 3 in the pulp
- 40 in the pericarp
- The highest recorded amount of XANTHONES in anything else is 2!

目前，科学家研究发现对人体有益的氧杂蒽酮多达200多种，然而普遍存在于植物内的氧杂蒽酮很少超过八种以上，但山竹果却蕴含了超过70种氧杂蒽酮成分，因此被称为“氧杂蒽酮之王”

Mangosteen Information: Internatioanl Scientific Research

山竹果相关研究之国际文献列表

山竹果皮萃取物對乳癌細胞生長有抑制效果。【泰國Mahidol大學】

6種山竹xanthenes可抑制HL60血癌細胞生長，alpha-mangostin可殺死血癌細胞。日本Gifu國際生物科技研究所

山竹果皮中的alpha-、beta-mangostins及garcinone B對結核菌(TB)有強烈抑制效果。泰國曼谷Srinakharinwirot大學

garcinone能殺死肝癌、胃癌及肺癌細胞。台灣台北榮民總醫院

山竹為泰國民間傳統用藥，研究證實山竹果強烈抑制組織胺釋出及抑制前列腺素E合成功效，對預防過敏很有效。日本Tohoku大學

山竹果在東南亞普遍用在皮膚感染、傷口修復及腹瀉上，研究證實山竹果果皮之gamma-mangostin有強烈抑制前列腺素E2(PGE2)釋出效果。日本Tohoku大學

氧化破壞在心臟血管疾病及其它慢性疾病中扮演關鍵性角色，研究證實山竹果中的xanthone及mangostin可抑制低密度脂蛋白(LDL、一種壞膽固醇)，如果LDL之氧化受到抑制，則LDL膽固醇就無法表現出它“壞”的性質，而不致引起心臟病。泰國Songkla王子大學

山竹果之xanthone及mangostin有抑制愛滋病毒(HIV)複製之能力。比利時Antwerp大學

山竹果之alpha-mangostin及gamma-mangostin為組織胺及血清素接受器之抗拒劑，故可抑制發炎及對抗過敏。日本Tohoku大學

alpha-mangostin佔據了組織胺接受器之位置使組織胺無法發揮作用，山竹果能有抗發炎及抗過敏之作用，原因在此日本Tohoku大學

山竹果可抑制金黃色葡萄球菌，試管中證實Xanthone衍生物methicillin(一種盤尼西林)敏感及拮抗之金黃色葡萄球菌菌株均有強烈之抗菌作用。日本Gifu醫藥大學

低密度脂蛋白(LDL)之氧化在動脈硬化中扮演重要角色，山竹之mangostin扮演自由基清道夫角色(海綿式吸食掃蕩)來保護LDL不受到氧化，也就是它是一種很強的抗氧化劑。西澳洲大學Royal Perth醫院

山竹果之alpha-mangostin對腎上腺癌細胞有很強的殺滅作用。日本Tohoku大學

Xanthenes保護內皮細胞，抑制單核球細胞黏附在內皮上，可阻止血管內斑塊的形成，從而達到預防心臟血管疾病的效果。中國長沙中南大學

以27種山竹Xanthenes對人的乳房、腎臟、黑色素細胞做研究，發現不同的x對癌細胞之抑制能力有所不同。葡萄牙Porto大學

植物體中自然形成的Xanthenes有200種，而山竹果截至2007年6月為止，已被發現含有其中40種Xanthenes衍生物，為已知植物中含量最高的，一般植物之Xanthenes衍生物不會超過8種。泰國曼谷Srinakharinwirot大學

以老鼠為試驗對象，所有的Xanthenes衍生物都有降血壓效果。台灣高雄醫學大學

Mangiferin是一種Xanthenes衍生物，可以降低第二型糖尿病老鼠的血糖，推測mangiferin可能是透過降低胰島素之抗拒性而使血糖降低。日本Suzuka大學

有五種Xanthenes衍生物可抑制血栓形成(按：對阻塞性腦中風有預防作用)。波蘭醫學大學

Xanthenes衍生物對抗痙攣有效。波蘭Jagiellonian大學

Xanthenes對血管有鬆弛之作用(可用來降血壓)。台灣台大醫學院毒物科

Xanthenes有很強的抗癩疾效果。美國Oregon健康科學大學

Xanthenes有很強的抗血栓效果(對預防中風有效)。台灣高雄醫學大學

Xanthenes有很強的抗癌效果。台灣高雄醫學大學

所研究的18種Xanthenes中，部份Xanthenes確實有抗發炎作用。台灣高雄醫學大學藥劑系

Xanthenes是一種很強的monoamine oxidases抑制劑(可紓解焦慮，促進入睡)。瑞典de Lausanne大學

Xanthenes衍生物對人類癌細胞具有抗腫瘤效果。台灣高雄醫學大學

Rich in Xanthenes,
the Super Antioxidant
from Mangosteen Rind
富含氧杂蒽酮，源自山
竹壳的超级抗氧化剂

Xanthenes are the most powerful known Antioxidant that able to kill cancerous cells within 24 hours. Mangosteen is the only fruit that contains over 50 types of Xanthenes.

氧杂蒽酮是已知的最强抗氧化剂，实验证实了它能够在24小时内消灭癌细胞；而山竹是唯一拥有超过50种氧杂蒽酮的水果。

美國超級神奇抗癌山竹果汁

細胞實驗 24小時讓癌細胞即死亡

在傳統醫療領域裡，山竹果汁已經被應用了幾個世紀？

如今超過了30年的科學驗證證實它的療效作用。

9月21日 星期日 北港 26-29 12:24

Mangosteen 认识山竹果

山竹(mangosteen), 原产于马来半岛和马来群岛, 在东南亚地区如马来西亚、泰国、菲律宾、缅甸栽培较多。属藤黄科常绿乔木, 树高可达15米, 果树寿命长达七十年之上。叶片椭圆, 花似蜀葵, 瓣红蕊黄, 大多为春花秋实。山竹虽然种植成本不高, 但需种植多年才可收获, 一般在定植后10年才能采果。因产量不高, 以致物罕为贵

现在已经很多人在喝山竹果汁, 你喝了吗?

Mangosteen juice , did you drink it ?

为什么要喝 DNG 山竹果汁? Why DNG Mangosteen Mixed Fruit Drink ?

10	136823	136823	136823	136823	136823	136823	10000	7.3

Note: Total antioxidant capacity was analysed using Oxygen Radical Absorbance Capacity (ORAC) assay. ORAC is a measure of antioxidant capacity. Units are µmol Trolox equivalents per gram (µmol TE/g).

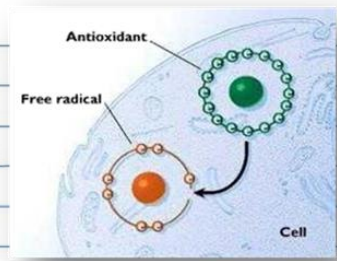

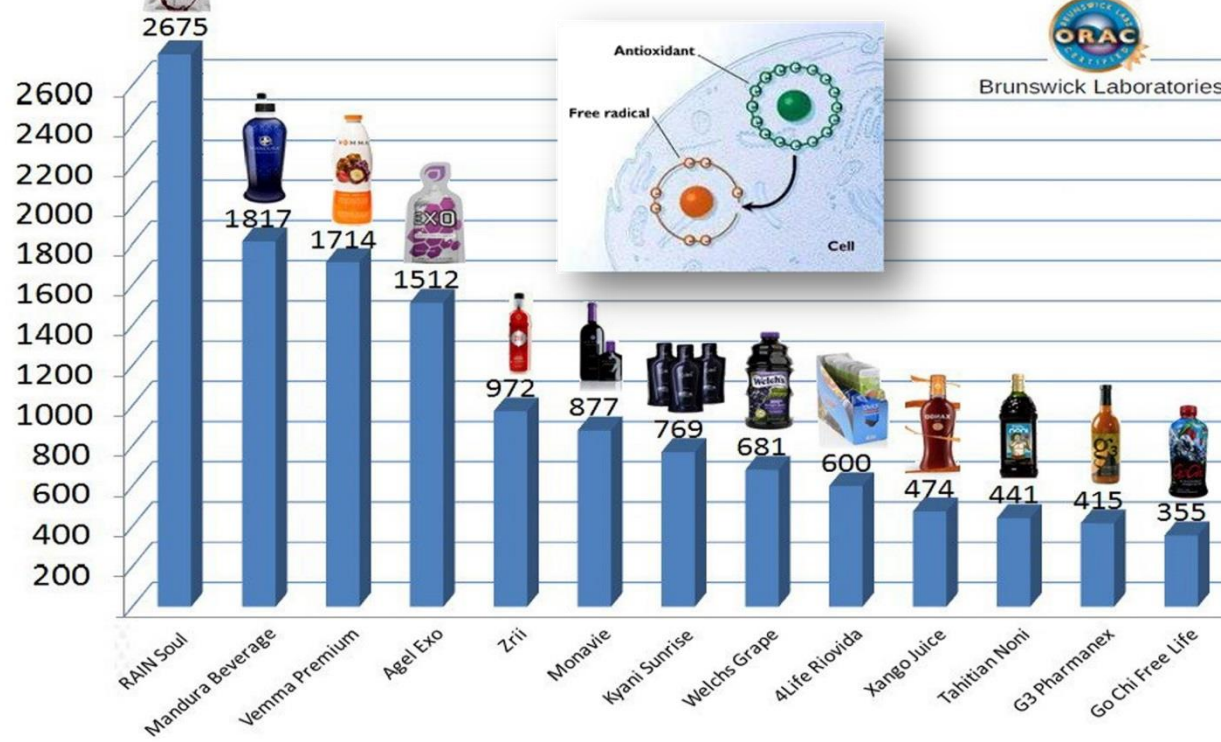

Method: The method used to measure antioxidant capacity is based on the reaction of antioxidants with peroxyl radicals. The rate of decrease in absorbance of a peroxyl radical is measured over time.

Average ORAC (µmol TE/g): 14224
 Average ORAC (mg TE/100g): 4269

An analysis from NUS S'pore in 2014 clearly stated that each sachet of 28 Mangosteen Plus has an ORAC value of 4,299. 由新加坡国立大学在2014年完成的化验报告指出，每一包28山竹果汁的ORAC值是4299。

Oxygen Radical Absorbance Capacity / 30 ml

Brunswick Laboratories

Why We Need **DNG WORLDWIDE MANGOSTEEN** Everyday?

为何我们每天都需要 ?

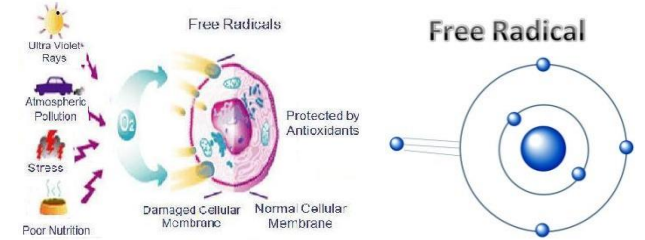

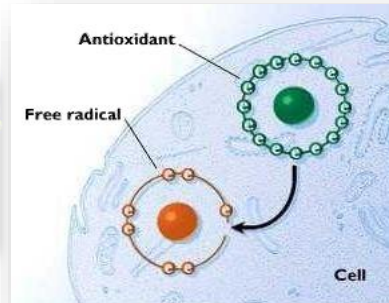

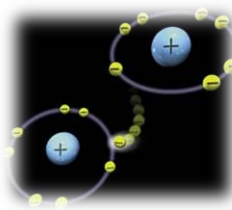

LOW
Antioxidant Level
(Age faster & Diseased)
抗氧化能力低
(老化增快、疾病缠身)

According to FDA, we need to take at least 5,000 ORAC unit/day in order to maintain healthy. Low intake of ORAC unit daily will result in oxidative stress, which is the reason behind aging & diseases.

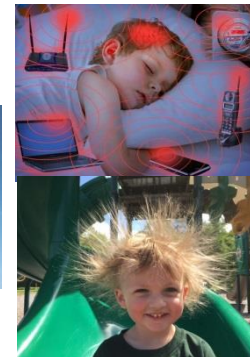

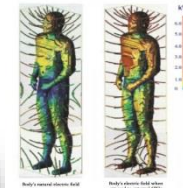

HIGH
Antioxidant Level
(Age slower & Healthy)
抗氧化能力高
(延缓老化、身心健康)

根据美国FDA，我们每天都需要摄取至少5000抗氧化值(ORAC)来确保健康的身心。当摄取的ORAC单位不足，人体就会面对各种自由基的侵害，进而加速老化及增加患病的机率。

细胞电位不平衡！只有7粒电子！

真人真事见证

我不爱吃蔬菜水果。自从喝了28混合果汁后，我可以每天顺畅排便，精力充沛，感觉美好！

便秘问题消失了！

Constipation!

Constipation! 严重便秘

我有多年的便秘问题，2-3天才大便一次。每天都一定要蹲在马桶超过半个小时，却不一定能排便。脸上还不时长痘痘，导致多个深凹的痘疤。渐渐地，皮肤更变得暗淡。现在，一蹲在马桶上就可以立刻排便。脸上的痘疤不但变浅，皮肤也变得有光泽了。

1 sachet every morning and night

I started every morning 8 night
服用时间：2个月
Consumption period: 2 months

我有家族遗传的老人斑。从40岁开始，身上的皮肤都有老人斑，尤其是在手臂和脸上。近年来，老人斑变成越来越多。此外，我还有眼角的飞眼。只要看到强光，我就会看到很多的黑点飞来飞去。我也尝试过其他的补品，但是却没有改善。

两个月后，手上的老人斑变浅，皮肤也有光泽了。而且，左边的眼睛已经看不到飞来飞去的黑点了。我的右眼还是有飞眼的问题，但看到的黑点也变少了。感谢我的朋友给我MANGOSTEEN PLUS。

I have inherited dark spots problem. Since I was in my 40, I have more and more dark spots on my skin, especially on my face and hands. Recently, the number of dark spots showed a sudden increase. I have 3 years of floaters too. Whenever I looked into the wall, there were so many dark spots flying around. I have tried to eat tonic food for eyes but there was no improvement.

After 2 months, the dark spots on my skin faded. The floaters also improved and my left eye sees less dark spots. Although my right eye still see dark spots but I already feel contented with the improvement shown. Thank you a friend who gave me MANGOSTEEN PLUS.

下午 楠文慧
2 months consumption
服用时间：5个月
Consumption period: 5 months

我从小开始就有雀斑了。我二十岁时，身上的雀斑已经非常的多，尤其是在手臂和脸部。这困扰我十五年的雀斑问题随着服用MANGOSTEEN PLUS，让我的雀斑数量都得到改善身上的雀斑。这让我非常高兴，很想把手臂和脸部遮盖起来。因此，我出门一定会用粉底遮盖脸上的雀斑。而且，我还想不到如何改善它。

5个月之后，手臂和脸部的雀斑变少了。我的感觉是一比多多的雀斑都随着MANGOSTEEN PLUS，虽然手臂和脸部还是有雀斑，但现在的数量比以前少，也不怕穿光裸的衣服了。

I have freckles since 40 years old. In my 50, the number of freckles increased especially on my arms and face. The freckles, which have lasted for years made me feel so humble and depressed. My skin became so dull. Whenever my friends discussed about my freckles, I felt extra humble and wanted to find a place to hide myself. Every morning before I go to work, I will use concealer to hide all the freckles and only wear long-sleeves top.

5 months later, the freckles on my arms and skin faded. Thank you my neighbour who recommended MANGOSTEEN PLUS to me. Now, I have regained self-confidence and I dare to wear short-sleeves top already.

HEMATOLOGY

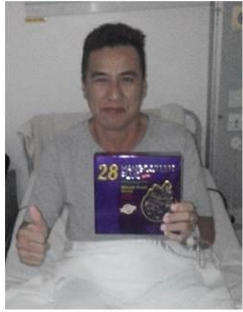

WBC: 1.125 x10⁹/L (150 - 400)

Platelet Count: 226 x10⁹/L (150 - 400)

早、午、晚各喝5条
服用时间：1个星期

骨痛热症

早、午、晚各喝2条
服用时间：11天

Tan Sia Jim
(55岁)

“我的血小板指数迅速下降至有生命危险的可能性，只有20点。全身不但感到无力、腰酸背痛、也没胃口吃东西。医生一直叮咛我多补充水分，以避免血小板逐渐下降。”

11天后

“现在，血小板上升至265点。喝了果汁的第二天，血小板指数就开始逐渐上升至37点；在第十天，已经可以出院了。”

风湿痛

Rheumatism

早、午、晚各喝1条
服用时间：2个月

Wai Koon
(51岁)

“我患上20多年的风湿痛。风湿痛一发作，膝盖的关节就会红肿且疼痛，就连吃止痛药也没有效用。我尝试各种保健产品，却没有任何改善。”

2个月后

“现在，膝盖的关节没那么僵硬、风湿痛也少发作了。医生都证实我的风湿痛已经改善许多。”

半年前，我的肝脏开始硬化，每天要吃化疗药物。随着逐渐衰退的肝脏功能，嘴唇变成深黑色，肝脏发炎指数也飙升到216点。现在，肝脏发炎指数下降至正常指数，104点。黑色的嘴唇也变成正常的颜色，肤色也变得有光泽。

DNG

Lung Cancer (Stage 4)

3 sachets every morning & evening Duration: 4 months

Tan Geok Eng (61 yrs old) 肺癌 (第四期)

A year ago, I was suffering from lung cancer stage 3. A month later, my condition got worse and worse until stage 4, the cancer cells spread to the bone marrow, caused my spinal fractures and the tumour became larger. Pulmonary edema made me difficult to breathe and kept on coughing. After three months of treatment, uncontrolled cancer cells caused my spinal fractures again.

After 4 mths

Now, lung tumour has been significantly reduced, and no more edema, no coughing, breathing smoother. The doctor confirmed that cancer cells under control, no longer need to do the electrotherapy.

Before After

Lung Cancer (Stage 4)

2 sachets every morning & evening Duration: 8 months

Ooi Ah Kim (75 yrs old) 肺癌 (第四期)

A year ago, I was suffering from final stage of lung cancer, cancer index more than 1200 points. Pulmonary edema cause I felt short of breath. In doing chemotherapy, its side effects often cause me vomit, no appetite to eat. Thus, the body gradually thin.

After 8 mths

Now, cancer index has dropped to 37 points. I feel better and gradually increase in strength.

Before After

Fri, 21 Apr

I started taking Mangosteen Plus after my Mum recommended it to me. This was during the period of early 2016. After taking 2 sachets a day for a week, I realized that I felt more energized and the muscle aches that I had due to taking daily oral chemo pills, were no longer present. I felt normal! And trust me it was a feeling I had not felt for years ever since I was diagnosed with Chronic Myeloid Leukemia in Aug 2011. Till this day, I have religiously continued to take

血癌患者

Chronic Myeloid Leukemia

我是一位二十多岁的血癌患者已经在做过两次化疗, 医生也说我的血癌还有很多手尾, 不可能会有孩子了。

每天喝两条

自从2016 喝了由母亲介绍 DNG 的 Mangosteen Plus 之后, 我的化疗后遗症(肌肉疼痛) 竟然在一个星期后好了, 不痛了。过后我继续喝DNG的 Mangosteen Plus, 大约一年后, 我再回去医院检查, 我的血癌指也恢复正常而且还怀孕了。不久后也是顺利的生下一个健康的男孩。我全家人都非常感谢 DNG 的产品。

你喝了吗 DNG Mangosteen ?

**The Combination of
Traditional Medicine with Western Technologies
Develop Nutrigenomically-active Formula**

**结合中西科技
研发最新营养基因学产业**

Main Ingredients 主要成份

@ Sulforaphane (SFN)

- 1992年, Johns Hopkins大学的一组科学家在西兰花中分离出了一种叫做**萝卜硫素 (SFN)**的抗癌植物化学物质。

- 这种细胞保护基因包括谷胱甘肽。大约有200个基因已经被很好地表征, **有多达1700个被认为与细胞防御有关。**

- 在1997年的发现中, 在3-4天龄的西兰花芽中**葡萄糖磷脂 (Glucoraphanin)**的浓度更高, 至少是全长西兰花浓度的**20倍。**

- 西兰花芽富含萝卜硫烷, 这是一种正在研究其抗癌特性的化合物。

- In 1992, a research group at Johns Hopkins University in USA discovered a potent anti-cancer phytochemical, sulforaphane from young broccoli sprouts.
- Cytoprotective genes include glutathione. Around 200 genes have been well-characterised, as many as **1700 are thought to be related to this aspect of cellular defense.**
- In 1997, researchers discovered that 3-day old broccoli sprouts are concentrated sources of Glucoraphanin, offering **20 times** more of it, than mature broccoli plants.
- Broccoli sprouts are rich in sulforaphane, a compound that is under investigation for its anti-cancer properties.

Amla extract
Emblica officinalis
“印度醋栗”

在已经有3,000年历史的印度的传统医学“阿育吠陀”, 印度醋栗是一种主要的药物。

"It's one of the most important ingredients in Ayurveda, the 3,000 year-old traditional medicine system which originated in India."

Broccoli Sprouts are the Richest Source of Sulforaphane

The amount of sulforaphane (glucoraphanin) can vary widely in vegetables (R).

Broccoli is not the only cruciferous vegetable which has SFN, but it yields the highest amounts, with glucoraphanin content around 75% of total glucosinolates (R).

Furthermore, **3-day-old broccoli sprouts contain 10-100 times higher levels of glucoraphanin than does the mature broccoli (R).**

7 Good Reasons to Choose D'Cella :

- ✓ Extracted from 3-4 days old young broccoli sprouts
- ✓ Highest sulforaphane yielding broccoli sprout ingredient
- ✓ Potently activates cellular defences via Nrf2 and other mechanism
- ✓ Helps protect against ingested and inhaled toxins
- ✓ Hydrogenically-produced using our unique technology
- ✓ Non-irradiated
- ✓ Non-GMO

7个选择 D' Cella的原因 :

- 从营养价值丰富的西兰花嫩芽萃取
- 蕴含最高浓度的SFN精华
- 活化细胞里的Nrf2, 以增强体内的防御系统
- 帮助细胞免受毒素侵害
- 使用 Hydroganic 技术所制成
- 无受辐射污染的农作物
- 无转基因的成分

酵素

消化系统

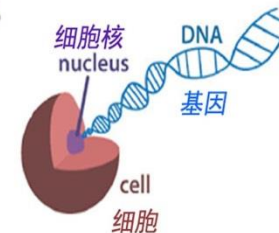

吸收

毒素

- 蛋白质
- 碳水化合物

Amla (Embilica officinalis Gaertn.) extract promotes procollagen production and inhibits matrix metalloproteinase-1 in human skin fibroblasts.

Fuji T, Yokoyama M, Iwami T, Saito M

Institute for Health Sciences, 1890 Corporation, 12-4, Narushima 3, Nakomyo-6-8-142, Hyogo, Japan. fuji@nphpru.nu.jp

Abstract

AIM OF THE STUDY: *Embilica officinalis* Gaertn., commonly known as amla, is a rich dietary source of vitamin C, minerals and amino acids, and also contains various phenolic compounds. Amla extract is also known to exhibit potent antioxidant properties and to provide protection for human dermal fibroblasts against oxidative stress, and therefore it is thought to be useful for natural skin care. In this study, we investigated the effects of amla extract on human skin fibroblasts, especially for production of procollagen and matrix metalloproteinases (MMPs), in vitro.

MATERIALS AND METHODS: Mitochondrial activity of human skin fibroblasts were measured by WST-8 assay. Quantification of procollagen, MMPs, and Tissue inhibitor of metalloproteinase-1 (TIMP-1) released from human skin fibroblasts were performed by immunoblotting technique.

RESULTS AND CONCLUSIONS: Amla extract stimulated proliferation of fibroblasts in a concentration-dependent manner, and also induced production of procollagen in a concentration- and time-dependent manner. Conversely, MMP-1 production from fibroblasts was dramatically decreased, but there was no evident effect on MMP-2. TIMP-1 was significantly increased by amla extract. From these results, it appears that amla extract works effectively in mitigative, therapeutic and cosmetic applications through control of collagen metabolism.

PMID: 1822954 (PubMed - indexed for MEDLINE)

2008年的研究顯示印度醋栗具有促進膠原蛋白增生的效果，主要是因為它可以在皮膚的纖維母細胞增加膠原蛋白原 (procollagen, 膠原蛋白的前驅物) 的生成以及抑制第一型金屬蛋白酶 (matrix metalloproteinase-1, 主要作用是增加膠原蛋白的破壞) 的作用。

Type I pro-collagen promoting and anti-collagenase activities of Phyllanthus emblica extract in mouse fibroblasts.

Chotrakorn C, Chotrakorn Y, Luksomsri S, Chotrakorn S, Wachrasamee S, Nimsirakul U

Department of Physiology, Faculty of Pharmaceutical Sciences, Chulalongkorn University, Bangkok, Thailand

Abstract

As part of an ongoing search for the novel pharmacological activities of *Phyllanthus emblica*, the present study has shown its type I collagen promoting and anti-collagenase effects on primary mouse fibroblast cells. At a concentration of 0.1 mg/ml, amla extract significantly increased the type I pro-collagen level up to 1.65-fold, and 6.78-fold greater than that of an untreated control, determined by immunofluorescence and Western blot analysis, respectively. Amla extract caused an approximately 7.77-fold greater type I pro-collagen induction compared to the known natural collagen enhancer ascorbic acid at the same treatment concentration (0.1 mg/ml). Moreover, amla extract inhibited collagenase activity in a dose-dependent manner. Maximal inhibition was observed (79.67 +/- 3.51%) at a concentration of 1 mg/ml. In summary, amla extract has a promising pharmacological effect that benefits collagen synthesis and protects against its degradation and could be used as a natural anti-aging ingredient.

PMID: 19691925 (PubMed - indexed for MEDLINE)

2009年的研究顯示印度醋栗可以在纖維母細胞上促進第一型膠原蛋白原 (Type I procollagen) 的增生，並且減少膠原蛋白酶 (collagenase) 的作用。

Wound Repair Regen. 2009 Jan-Feb;17(1):96-107.

Embilica officinalis exerts wound healing action through up-regulation of collagen and extracellular signal-regulated kinases (ERK1/2).

Sumbira M, Manikandan P, Gaurath VS, Mahendran P, Suguna L

Division of Cardiovascular Medicine, The GE Heart Institute, University of Kentucky, Lexington, Kentucky, USA.

Abstract

During wound healing, the wound site is rich in oxidants, such as hydrogen peroxide, mostly contributed by neutrophils and macrophages. Ascorbic acid and tetraons of low molecular weight, namely emblicanin A (2,3-D-O-galloil-4,6-O-(3-hydroxydihydroxyphenyl-2-keto-glucosyl)-delta-lactone) and emblicanin B (2,3,4,6-O-(3-hydroxydihydroxyphenyl-2-keto-glucosyl)-delta-lactone) present in *Embilica officinalis* (amla), have been shown to exhibit a very strong antioxidant action. We proposed that addition of these antioxidants to the wound microenvironment would support the repair process. The present investigation was undertaken to determine the efficacy of amla on dermal wound healing in vivo. Full-thickness excision wounds were made on the back of the rat and topical application of amla accelerated wound contraction and closure. Amla increased cellular proliferation and cross-linking of collagen at the wound site, as evidenced by an increase in the activity of extracellular signal-regulated kinase 1/2, along with an increase in DNA, type II collagen, acid-soluble collagen, ascorbate content, storage temperature and tensile strength. Higher levels of free ascorbic acid, alpha-tocopherol, reduced glutathione, superoxide dismutase, catalase, and glutathione peroxidase support the fact that amla application promotes antioxidant activity at the wound site. In summary, this study provides firm evidence to support that topical application of amla represents a feasible and productive approach to support dermal wound healing.

Inhibition of UV-induced ROS and collagen damage by Phyllanthus emblica extract in normal human dermal fibroblasts.

Mahesh M, Sanku B, Rajasekhar S, Sivalakshmi A, Pillai S, Ghoshal SG

Sari Labs Limited, Pooneri Industrial Area, Bangalore 560005, India

Abstract

As a part of ongoing research for novel natural cosmeceutical actives from plant extracts, this study demonstrates that *Phyllanthus emblica* fruit extract has shown its efficacy in protection against ultraviolet-B (UV-B) irradiation-induced reactive oxygen species (ROS) and collagen damage in normal human dermal fibroblasts. At a concentration of 0.5 mg/ml, amla extract showed a significant response of 0.5 ± 0.25-fold protection from UV-B induced collagen damage as compared to untreated cells. As known active, ascorbic acid, at a concentration of 0.5 mg/ml, showed 3.7 ± 0.07-fold protection from UV-B induced collagen damage. While the untreated cells showed 54 ± 1.4% induction in ROS on UV-B irradiation as compared to the non-irradiated cells, amla extract treatment inhibited the induction of ROS to 12 ± 4% at a concentration of 0.5 mg/ml. Ascorbic acid inhibited the induction in ROS to 64 ± 2% at a concentration of 0.5 mg/ml. Amla extract is a significantly better natural active, with promising cosmeceutical benefits against photoaging.

PMID: 21443343 (PubMed - indexed for MEDLINE)

A major inducer of anticarcinogenic protective enzymes from broccoli: Isolation and elucidation of structure

(chemoprotection/enzyme induction/isothiocyanates/sulforaphane/quinone reductase)

YUESHENG ZHANG*, PAUL TALALAY*†, CHEON-GYU CHO‡, AND GARY H. POSNER‡

Contributed by Paul Talalay, December 19, 1991

ABSTRACT Consumption of vegetables, especially crucifers, reduces the risk of developing cancer. Although the mechanisms of this protection are unclear, feeding of vegetables induces enzymes of xenobiotic metabolism and thereby accelerates the metabolic disposal of xenobiotics. Induction of phase II detoxication enzymes, such as quinone reductase [NAD(P)H:(quinone-acceptor) oxidoreductase, EC 1.6.99.2] and glutathione S-transferases (EC 2.5.1.18) in rodent tissues affords protection against carcinogens and other toxic electrophiles. To determine whether enzyme induction is responsible for the protective properties of vegetables in humans requires isolation of enzyme inducers from these sources. By monitoring

gate broccoli (*Brassica oleracea italica*) specifically because it is consumed in substantial quantities by Western societies and has been shown to contain abundant phase II enzyme inducer activity (21). In this paper we describe the isolation and identification of a potent major phase II enzyme inducer from broccoli.

MATERIALS AND METHODS

Source of Vegetables and Preparation of Extracts. SAGA broccoli was grown by Andrew Ayer (Maine Packers, Caribou, ME). SAGA is synonymous with Mariner broccoli (Detroit, Ann Arbor, MI) and was selected for growing

1992年，美国科学院院士Paul Talalay教授揭开了西兰花抗癌的秘密——西兰花中含有大量的萝卜硫素前体物质——萝卜硫苷，而萝卜硫素是迄今为止人类在果蔬中发现的抗癌作用最强的植物活性成分。

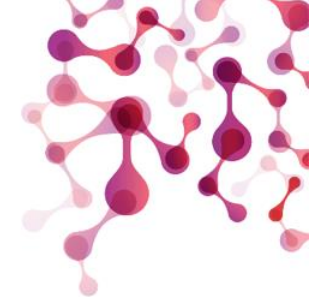

研究发现：“萝卜硫素能靶向激活人体内的Nrf2信号通路，上调第二阶段相解毒酶和抗氧化酶活性，有效清除致癌物和自由基，抵御癌症！”

Sulforaphane Benefits

The medical benefits of Sulforaphane are proven through a lot of medical researches & hospital from all around the world.

多所来自世界各地的研究中心及医院都证实了西兰花芽的医疗功效。

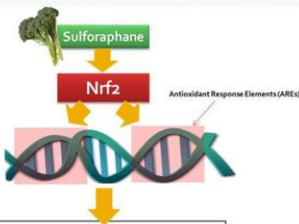

Broccoli Sprouts, cancer prevention and detoxification

青花椰菜苗, 预防癌症和帮助身体排毒

By Geoff D'Arcy, Lic. Ac., D.O.M

When your mother told you, "Eat all your vegetables and don't miss the broccoli, it's good for you!" she was right!

Now the experts agree. The American Institute of Cancer Research estimated that 10.3 million people in the United States are making cancer prevention a top priority. According to the American Cancer Society, about 30 to 40 percent of all cancers can be prevented.

That consumption of The USDA's Dietary Guidelines and American growing knowledge. It is a 20-year worldwide, simple words from your mother can be a powerful weapon. Dietary changes can make a difference (as assessed annually).

What is it about vegetables that makes them so protective? The phytochemicals in the body are: alliinase, glucosinolate, and another amazing compound found in broccoli, sulforaphane.

- Antioxidants
- Phase II Enzymes (detoxification)

These compounds increase the body's own defense system against carcinogens. Cells in the body contain a family of detoxification enzymes (Phase 2 enzymes) that neutralize cancer-causing chemicals as well as free radicals before they damage DNA and initiate cancer. Chemo-protection can be accomplished by activating the body's Phase 2 "defense." The Phase Two enzymes are an integral part of the body's amazing detoxification system, neutralizing carcinogens and making them inactive. This detoxification system turns carcinogens and other toxic substances into harmless molecules that are excreted from the body.

Sulforaphane 能让启动人体制造“抗癌酵素”

In his article "Sulforaphane Stimulates the Body's Cancer Fighting Enzymes," Richard Conant describes how sulforaphane works. "The detoxification of carcinogens and other

Sulforaphane 能启动身体生产第二阶段“排毒酵素”

According to studies by Dr. Paul Talalay and his colleagues at Johns Hopkins University School of Medicine, sulforaphane enhances the cancer-protective capacity of animal cells. **Sulforaphane induces Phase 2 (detoxification) enzymes, which are the enzymes that help to deactivate carcinogens and free radicals, thereby enhancing the body's own defense system against cancer-causing chemicals.**

Some of the best growing techniques now guarantee large quantities, up to 5,500 parts per million, of sulforaphane within organically grown broccoli sprout powder. "Three-day old broccoli sprouts consistently contain 20 to 50 times the amount of chemo-protective compounds as mature broccoli," says Paul Talalay, M.D. (See simple, dietary means of chemically reducing cancer risk," says Paul Talalay, M.D. (See Fahey, Zhang and Talalay, "Broccoli sprouts: An exceptionally rich source of inducers of enzymes that protect against chemical carcinogens.") In general, Brassica family plants such as broccoli are rich in sulforaphane in its glucosinolate precursor form. Unfortunately, broccoli must be eaten in large quantities to substantially reduce the risk of cancer. Preliminary studies suggest that to cut the risk of cancer in half, the average person would need to eat about two pounds of broccoli or similar vegetables per week. Because of the Johns Hopkins research, they were able to identify that broccoli varies in sulforaphane content, and that certain varieties of young broccoli sprouts, grown under standardized conditions, contain large, uniform quantities of the compound. And since the concentration of sulforaphane is much higher in broccoli sprouts than in mature broccoli, the same reduction in risk theoretically might be had with a weekly intake of just over an ounce of sprouts, and maybe a few capsules of sprout powder.

让身体能对抗由毒素引起的癌症

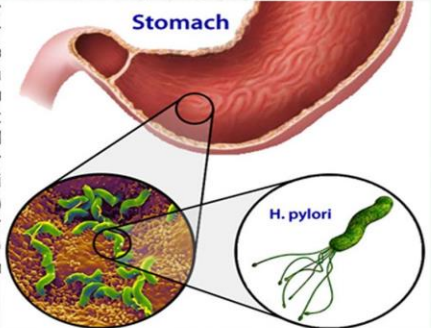

Sulforaphane 能阻止肿瘤的增生

In animal studies, **sulforaphane blocked tumor development**, reducing incidence, multiplicity, and size of carcinogen-induced mammary tumors. Small quantities of broccoli sprout extracts have reduced the incidence and size of mammary tumors in

可以杀灭“幽门螺旋菌”

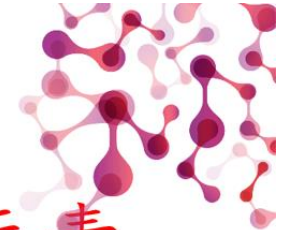

Sulforaphane kills H. pylori. In a recent article the Boston Globe reported, "In

laboratory tests the chemical, sulforaphane, killed H. pylori, which causes stomach ulcers and often fatal stomach cancer worldwide. The scientists found that sulfo was resistant to commonly used antibiotics. They tested a bacterium whether it is inside or outside cells. In human trials, sulforaphane was found to be effective in lining the stomach, making it more difficult to get rid of H. pylori. The Johns Hopkins University School of Medicine researchers will now seek to determine if sulforaphane can be used to treat H. pylori in humans. In some parts of Central and South America, up to 90 percent of the population is infected with H. pylori. "In some parts of Central and South America, up to 90 percent of the population is infected with H. pylori, a bacterium that causes stomach ulcers and often fatal stomach cancer worldwide," said Dr. Paul Talalay of the Johns Hopkins University School of Medicine. "In some parts of Central and South America, up to 90 percent of the population is infected with H. pylori, a bacterium that causes stomach ulcers and often fatal stomach cancer worldwide," said Dr. Paul Talalay of the Johns Hopkins University School of Medicine. "In some parts of Central and South America, up to 90 percent of the population is infected with H. pylori, a bacterium that causes stomach ulcers and often fatal stomach cancer worldwide," said Dr. Paul Talalay of the Johns Hopkins University School of Medicine.

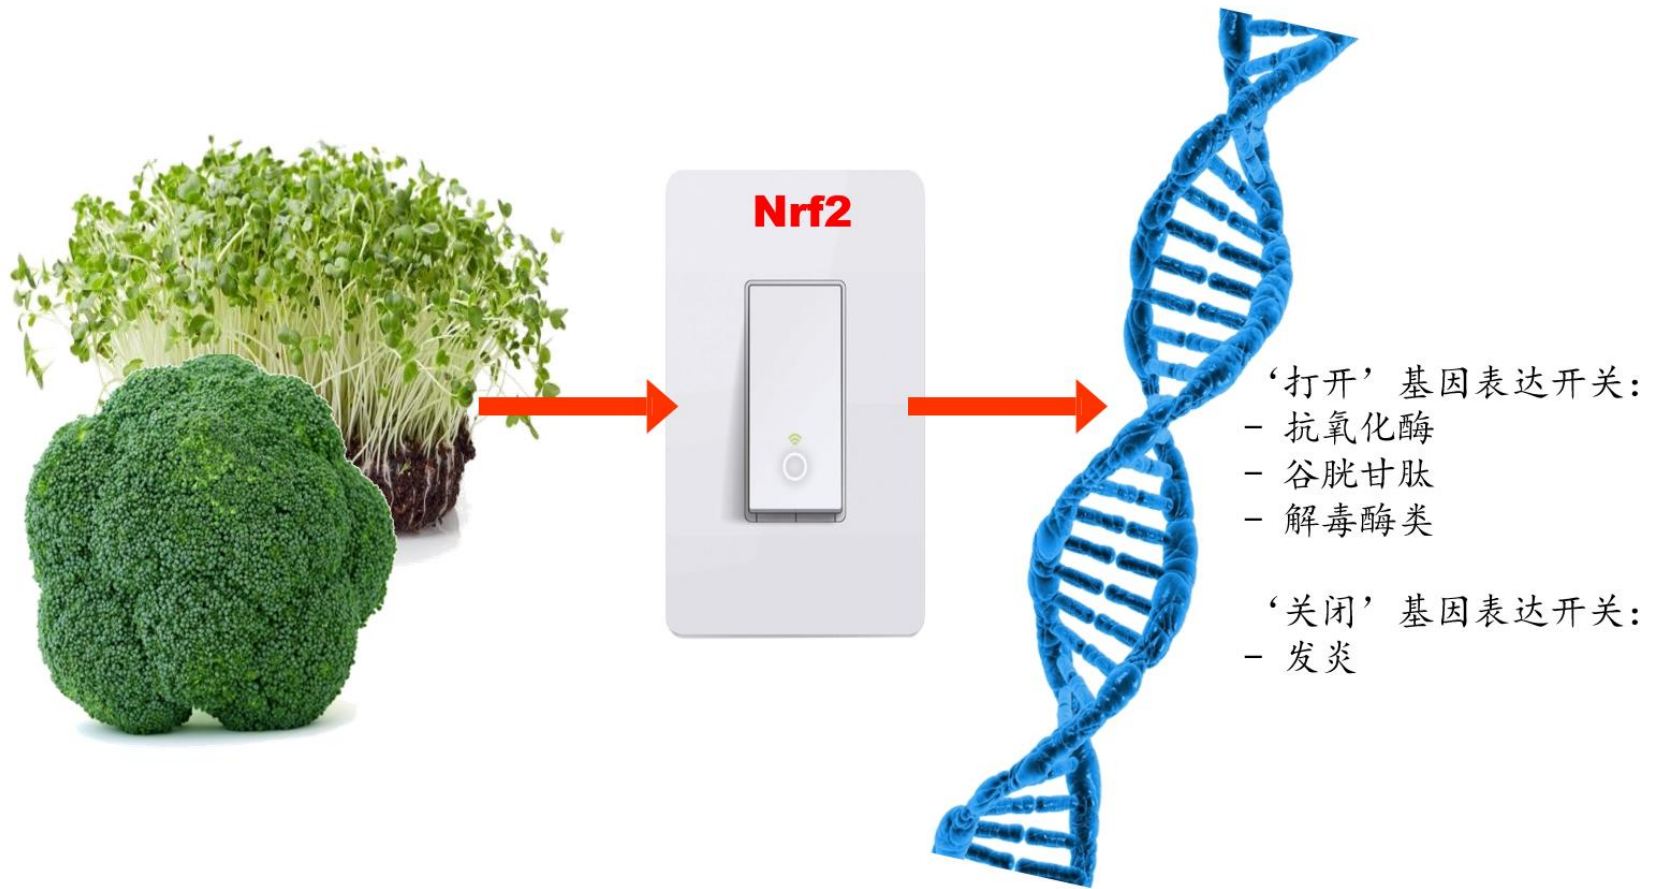

Who should consider supplementation?

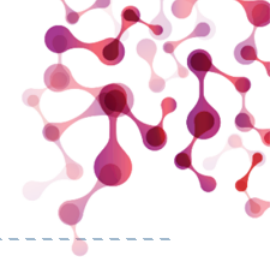

- Any person dealing with cancer presently or in the past, or anyone wanting to be sure of Chemo-prevention

3个月后

7年前，我患上糖尿病，每天服用降血糖药物。由于担心糖尿病会带来的并发症，我开始照顾饮食，以及配合服用保健产品。这几年来，血糖有少许的改善，值数还是超阈。2018年1月份，我的血糖还高达13.4。

一个月后，我发现血糖值数开始下降至8.5。3个月后，我的血糖控制在正常范围。

King of Herbs - Ginseng 百草之王 - 人參 Raja Herba - Ginseng

Sejak 5,000 tahun dahulu sudah menjadi produk kesihatan kerabat diraja negara China.

早在5,000 年前已是中国帝王贵族的保养品。

Since 5,000 years ago has been a royal family health product in China.

3 Fungsi Utama Ginseng 人參的三大滋益 Main Benefits of Ginseng

1 Meningkatkan Kecergasan
mengalakkan fungsi jantung & otak dan kekuatan fizikal

大補元氣
促进心脏功能、脑力及体力

Improve Vitality
promote heart & brain function
and physical strength

2 Pelarasan Dua Hala
mencapai keseimbangan badan dan minda

雙向調節
使身心得到平衡

Two-way Adjustment
achieve a balance body and mind

3 Kesihatan Ginjal
menjaga fungsi ginjal,
meningkatkan kualiti seks

益氣補腎
维护肾脏功能，提升性爱素质

Kidney Health
maintain kidney function and
enhance sexual quality

3 大独特成份 Unique Ingredients :

银杏
“生命之树”
Ginkgo Biloba
“Tree of Life”

银杏已存活在地球上超过2亿年了！它有助于调节血管张力和弹性，从而促进脑部、心脏和四肢的血液循环。临床试验证明银杏叶提取物对老年痴呆症有治疗功效。

It's been on earth for more than 200 million years! Ginkgo helps regulate the tone and elasticity of blood vessels, and thus increases blood flow to our brain, heart and extremities. Clinical studies showed that Ginkgo Biloba extract provides therapeutic benefits in Alzheimer's Disease.

东革阿里是一棵会开花的小树，生长在马来西亚和东南亚国家的热带雨林。它可以扩张血管以达到降低血压的效果。实验证明东革阿里可改善精子质量，达到更高自然怀孕的成功率。

东革阿里
“苦口良方”

Tongkat Ali
“Bitter Cures”

Tongkat Ali is a small flowering tree found in the rainforests of Malaysia and SEA countries. It helps lower blood pressure by dilating our blood vessels. Study has shown significant improvement in sperm quality, with higher successful rate in spontaneous pregnancy.

Panax 人參
“草藥之王”

Panax Ginseng
“King of Herbs”

早在5,000年前，人參在中国已是最受推崇的珍貴草藥。人參是傳統用來提高精力和增長壽命的補品。它可幫助提高身體適應壓力的能力、平衡身心、增強我們的心脏和神經系統。

Ginseng has been the most highly respected herb used in China since 5,000 years ago. Ginseng is traditionally used as a tonic for energy and longevity. It strengthens our heart and nervous system, helps body adapt to stress, and balance our body and mind.

这样的营养搭配，
远远超出单一成份
带来的效益！

This Combination of Nutrients
Gives You Health Benefits Far
Beyond that of a Single Ingredient!

Good Blood Circulation gives Good Health!

血液循环好，身体就好！

超级功效 Superb Health Benefits :

增强记忆力，注意力，警觉性，学习能力
Enhance memory, attention, alertness, learning ability

降“三高”
高胆固醇 高血压 高血糖
Reduce Blood cholesterol Blood pressure Blood sugar

促进血液循环
提高心脏肌肉的力量
Promote blood circulation Increase heart muscle strength

提高肾脏功能，排泄代谢产物
Improve kidney function, remove metabolic waste

改善情绪，睡眠质量
Improve mood, sleep quality

增进男女性功能、性欲、生育能力
Enhance sexual function in men & women, libido, fertility

提升能量水平，耐力，体力
Elevate energy levels, endurance, stamina

“注意！” 动脉硬化与年龄增长有着密切关系。但，动脉硬化开始年轻化，常伴有高胆固醇、高血压、高血糖，心脑血管疾病也随着提高。”

“Attention!” Atherosclerosis and increasing age are closely related. But, atherosclerosis starts to affect younger age group, often accompanied with high cholesterol, high blood pressure, high blood sugar, resulting in the rising incidences of heart, brain & kidney diseases.”

Yamato Clam

Perlindung Hati dari Japan

日本保肝聖品

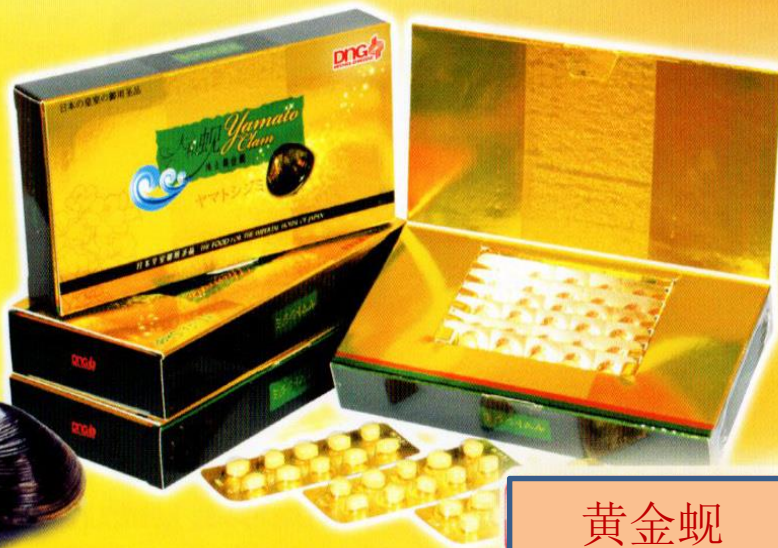

A Liver Protector from Japan

Berasal dari Kolam Shinji-Ko, Jepun yang bersih & tidak tercemar. 源自干净和不受污染的日本汽水湖。 Originated from the clean & unpolluted Lake Shinji-Ko in Japan.

大和蜆

黄金蚬

Kaya dengan pelbagai khasiat pemeliharaan hati seperti Kolina, Taurina, vitamin B12, asid amino, vitamin & mineral. 富含许多养肝的营养成分，如胆碱、牛黄酸、维生素B12、氨基酸、维生素和矿物质。 Rich in liver enhancing essences like Choline, Taurine, vitamin B12, amino acids, vitamins & minerals.

Melindungi organ hati, meningkatkan proses penyah toksikan badan & membekalkan tenaga. 保护肝脏、促进体内排毒过程和提供能量。 Protect liver organ, improve body detoxification process & provide energy.

Siapa paling memerlukannya? 谁最需要? Who need it most?

Tekanan hidup tinggi 生活压力高 High life pressure

Tidur tidak mencukupi 睡眠不足 Inadequate sleep

Pengambilan makanan tidak terkawal 暴饮暴食 Uncontrolled food intake

Mengambil minuman beralkohol 喝酒 Alcohol drinker

Selalu mengambil ubat 经常吃药 Always on medication

别说与你相“肝”

LOVE YOUR LIVER, LIVE YOUR LIFE

肝脏是人体第二大器官，

也是人体的解毒工厂，瞬间进行超过300多种不同的功能。除了分解体内毒素，肝脏还帮助转换脂肪，分泌胆汁，储存维生素，调节荷尔蒙等，并与其他器官有着非常微妙的相互关系。一旦肝功能退化，体内五脏六腑也会受到牵连，足见肝脏对人体健康有着巨大的影响。

医学书籍清楚记载
“蚌”对人体健康的重要

The benefits of Clam are well documented in ancient medical literatures

"Bencao Gangmu" recorded: "Clams stimulate appetite, reduce heat, sharpen vision, reduce urination, reduce alcohol intoxication & treat jaundice."

"He Han San Cai Tu Hui" recorded: "Clams help in alcohol intoxication & jaundice."

《本草纲目》记载：“蚌能升胃、去热、明目、利小便、解酒毒、治目黄”；《和汉三才图会》则提到：“蚌对酒毒及黄疸有效”。

《和汉三才图会》
"He Han San Cai Tu Hui"

Protein
Foundation of liver cells

Choline
Help prevent fatty liver & cirrhosis

精氨酸 Arginine
Repair & regenerate the liver cells

Taurine
Enhance the bile secretion

Manganese
Maintain normal metabolism of sugar & fat

Cobalt
Help activate blood formation

Potassium
Help regulate blood pressure

Iron
Element for blood formation

Zinc
Stimulate normal body growth

Glucosae
Release energy to the liver cells

Vitamin B12
Intermediary substances for the repair of liver

Calcium & Phosphorus
Form the bones & teeth

蛋白质 (构成细胞的基本元素)

胆碱 (有助于预防脂肪肝和肝硬化)

精氨酸 (促进肝脏的修复与再生)

牛磺酸 (促进胆汁分泌)

钾 (维持正常的血压和血液流动)

钙 (有助于骨骼的形成)

锌 (有助于刺激正常生长)

钴 (有助于激活血液形成)

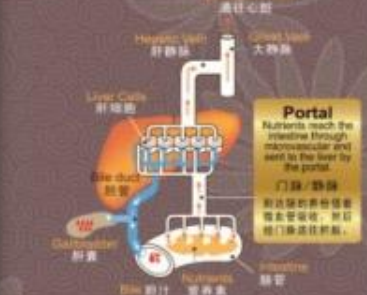

铁 (血液的重要组成部分)

维生素B12 (修复肝脏细胞的中间物质)

肝糖 (提供肝脏能量)

维他命B12 (修复肝脏细胞)

钙磷 (构成骨骼的基本元素)

大和蚌 - 惊人的功效

活化并提升内脏的功能，尤其是肝脏的正常运作。Activate & enhance the functions of internal organs especially liver.

促进身体的排毒能力，把药物、酒精等毒素的危害减低到最低。Enhance the body detox capability in order to minimize the dangers of the toxic from medication, alcohol, etc.

提供细胞所需的营养，加速新陈代谢。Provide necessary nutrients to the cells for better metabolism.

修复受损的细胞组织，帮助细胞的健康生长。Repair damaged cells & assist in the healthy growth of cells.

加强能量的释放，让活力充沛，精力提升。Boost the energy release so that you can have a fresh whole day.

放松心情，缓解紧张、压力、焦虑、失眠、记忆力减退等的问题。Relax the body & mind as to improve the problems of insomnia, stress, loss of memory, etc.

预防慢性血管性疾病，如胆固醇过高、心脏病、高血压、糖尿病等的风险。Prevent chronic vascular problems, eg. the risk of hypercholesterolemia, heart disease, hypertension, diabetes, etc.

提高身体的免疫功能，帮助对抗有害的细菌。Improve immune function to help in fighting harmful bacteria.

帮助消除多余的脂肪，减低体重。Help to reduce extra body fat for weight reduction purpose.

美丽养颜，让你容光焕发，光彩照人，神采飞扬。Beautify the skin & regain your cheerful appearances.

一粒粒营养丰富的大和蚌，可以让你活出一辈子的健康

A SMALL YAMATO CLAM CAN OFFER YOU WHOLE LIFE WELLBEING

男士的尊严品 Dignity product for men

养精蓄锐，提升活力，补充营养，每一天都精神焕发。Improve energy, reduce fatigue, provide nutrients for daily body needs.

女士的魅力品 Beauty product for women

养颜美容，塑造身形，平衡荷尔蒙，改善情绪等问题。Beautify the skin, build slimmer body contour, regulate hormones; improve emotional problems.

老人的安神品 Soothing product for elderly

帮助睡眠，安定情绪，预防老人痴呆症和骨质疏松等问题。Improve quality of sleep; calm emotion; prevent Alzheimer's disease & osteoporosis.

小孩的精灵品 Intellectual product for children

有助脑部和软骨的发展，加强营养的吸收，提高身体免疫功能。Enhance brain & cartilage developments; increase nutrient absorption; improve immune function.

Yamato Clam - Magnificent Benefits

肝脏的救星：“吃蚬保肝”

零污染的孕育环境

孕育大和蜆的汽水湖于2005年11月8日,荣获“国际湿地保护特区”之荣誉殊荣。

The List of Wetlands of International Importance

31 May 2009

The Director-General of Wetlands is pleased to announce the addition to the List of Wetlands of International Importance. Activities related to an "Eco-Label" which is a certification of the Ramsar Convention on the Conservation and Sustainable Use of Wetlands.

Wetlands of International Importance are areas of natural and or semi-natural wetlands considered of outstanding significance to humanity. In the world, there are 1900 Ramsar sites for such a status.

The Ramsar Convention on Wetlands (also known as the Convention on Wetlands of International Importance especially as Waterfowl Habitat) is the only global treaty for the conservation and sustainable use of wetlands. It was signed in 1971 at the International Conference on Wetlands in Ramsar, Iran.

It became operative in 1975. The Convention aims to protect the biological and ecological diversity of the world's wetlands and to promote their rational use and development. The List of Wetlands of International Importance...

汽水湖的“国际湿地保护特区”证书

重症
 多次病情被诊断患有甲状腺肿大、甲状腺功能亢进、医生都说血值不干净，药物也吃了不少药，可是问题没有改善，医生说一定要开刀治疗。

张廷莹 巴生
甲状腺肿大问题不复见

这种身体病内心的煎熬叫她又失眠，直到朋友口中提及，“去试试张廷莹巴生的介绍，给张廷莹“大和蜆”，并严格按照每次服用张廷莹给的“大和蜆”3粒，连续吃了5盒，之后便再复查血值，令我惊讶的是，血常规恢复到健康人的水平，甲状腺肿大问题不复见了！”

Mandy 巴生
一觉睡到天亮

肝肿大可能的不是，导致晚上不能一觉到天亮，对肝脏是晚上呼吸比较困难，不能像常人一样平躺睡觉，而必须侧身才睡的他人睡。“这个失眠问题困扰了我8、9年了，每次去医院时问医生能不能手术，真怕一做就完。”
 “之后，我按照到“大和蜆”，每天早晚吃各3粒，为的就是想尽快摆脱这难缠的问题，果然，在每天持续服用下，几个月后，现在我可以平躺睡觉了，再也没有过呼吸困难的问题。上次再次去做身体检查时，竟然发现肝肿大已经恢复正常了，让我有说不出的高兴，真的要感谢“大和蜆”。”

各大报章杂志狂推荐！

见证者心得分享

“吃蚬”帮助改善患有甲状腺肿大和血值问题，而本人是自行调理，吃张廷莹多种药膏，可喜。一盒买来好神，后来，服过几个盒，服药后胸有大块，只吃了4盒，就清了一手，甲状腺大减了，现在手觉得轻松。”

Double Lymphatic Drainage 双重淋巴排毒

Cellular Regeneration 细胞修复

全球首创
The World's First

bel'amour

Restore Balance & Beauty to The Body

Depressed immunity and poor circulation in lymphatic system can have an effect on the appearance of your skin and health. Poor lymphatic circulation may cause skin problems such as swelling, redness, puffiness, pimples, pigment, etc. Bel'amour is certainly a perfect choice for you as it helps to restore your natural beauty internally through improving blood circulation, toxin removal and cellular nourishment.

找回身体的平衡与健康

免疫功能下降，加上淋巴循环欠佳，都足以带给皮肤和健康严重的后果。淋巴系统排毒不好可导致各种皮肤问题，如肿胀、发红、浮肿、丘疹、黑斑等等，使您黯然失色。因此，Bel'amour 肯定是您明智的选择，因为它能轻松助您恢复血液的正常循环，排除毒素及滋养细胞，让您从内至外散发脱俗的娇媚。

Bel'amour: Application Methods
Bel'amour 激活霜使用法

Lymph drainage massage is a unique technique first developed in Europe as a physical therapy modality for the treatment of lymphedema disease. Experience has shown that it is not only for ill patients; lymph drainage massage is also a perfect technique to maintain health and improve the beauty of the skin.

By stimulating the body through massage with Bel'amour, lymphatic system can work more efficiently, which in turn boosts the immune system, clears blockages, eliminates toxins, transports nutrients to cells and increases the metabolism.

淋巴排毒按摩最先在欧洲国家风行, 是一种对淋巴水肿疾病的独特物理治疗方式。研究发现此按摩技术不仅对患者有效, 对于普罗大众的健康者而言, 也有助保护身体, 提升肌肤美丽的非凡作用。

使用Bel'amour 激活霜来进行淋巴按摩以活化身体, 可让淋巴系统更有效运作, 并可促进免疫系统的功能、减低细胞阻塞、排除毒素、运送养分到细胞和提高人体的新陈代谢。
